REVISION HIGHLIGHTS:

Revision 1, dated August 2013, incorporates the following:

- [Revised Cover for Revision 1](#)
- [Added Revision Highlights section](#)
- [Added Record of Revisions section](#)
- [Added Airworthiness Limitations section](#)

(This page is intentionally blank.)

AIRWORTHINESS LIMITATIONS

1. The FAA establishes specific life limits for certain component parts as well as the entire propeller. Such limits require replacement of the identified parts after a specified number of hours of use.
2. The following data summarizes all current information concerning Hartzell life limited parts as related to propeller models affected by this manual. These parts are not life limited on other installations; however, time accumulated toward life limit accrues when first operated on aircraft/engine/propeller combinations listed and continues regardless of subsequent installations (that may or may not be life limited).
 - A. Propeller models affected by this manual currently do not have any life limited parts.
 - B. There are no new (or additional) Airworthiness Limitations associated with this equipment and/or installation.
